

Commercial & Industrial Advanced Lighting Program

Purpose

The Commercial & Industrial Advanced Lighting Program is an energy efficiency program that encourages commercial and industrial customers to install high efficiency lamps and ballasts in their facilities.

Eligibility

- Business must have been in operation two years prior to January 1, 2011
- Business must be current on its power bill
- No empty buildings, inactive warehouses, or inactive storage areas.
- Business must be open or have its normal lighting load on for at least 50 hours per week.
- Retrofits of parking lot lighting, provided on photocell control, are eligible.
- \$213. Per kW of lighting load reduction.
- Commercial rebates are limited to \$15,000. Per upgrade (total of both customer and distribution system rebates) for any facility.
- Industrial customers rebate is limited to \$30,000. Per upgrade (both customer and distribution system rebates) for any facility.

Verification Procedure

Qualifying lighting must be identified or documented by EKPC or Member System staff prior to retrofitting. After the customer completes the retrofit, EKPC or Member System staff must verify the installed lighting retrofit. Demand and energy savings will be calculated based on lighting information gathered during the visits. EKPC will utilize the manufacturer's lighting fixture specifications and known measurements to calculate the savings; rebates under this tariff will be paid after these verification procedures are complete.
